

Name: _____ Date: _____ Per _____

Two Step Equations

Solve and **Check** each equation. Show every step.

1) $6 = \frac{a}{4} + 2$

2) $-6 + \frac{x}{4} = -5$

3) $9x - 7 = -7$

4) $0 = 4 + \frac{n}{5}$

5) $-4 = \frac{r}{20} - 5$

6) $-15 = -4m + 5$

7) $-9x + 1 = -80$

8) $-6 = \frac{n}{2} - 10$

9) $10 - 6v = -104$

10) $8n + 7 = 31$

11) $8n + 7 = 31$

12) $-9x - 13 = -103$

13) $-10 = -10 + 7m$

14) $\frac{m}{9} - 1 = -2$

15) $9 + 9n = 9$

16) $8 + \frac{b}{-4} = 5$
